

UNTIL THE LAST COLOR STANDS: COMMANDER'S MANUAL

1. INTRODUCTION

Welcome, Commander. You have been chosen to lead one of the four great civilizations. Your goal is simple but difficult: dominate the hexagonal world. You must manage your economy, feed your people, research advanced technologies, and command your armies.

There are two paths to victory:

1.  **Domination Victory:** Eliminate every other player from the map by conquering all their territories.
 2.  **The Civilization-Specific Victory:** Each empire has a unique threshold they must reach to claim instant victory.
-

2. HUD & RESOURCES

The top bar of your screen displays the lifeblood of your empire. Every action requires specific resources.

Icon	Resource	Description	How to Gain?
	Gold	Used to Construct buildings, Develop (upgrade) them, and Recruit soldiers.	Produced by Gold Mines and Ports .
	Food	Essential for army maintenance. Larger armies consume more food.	Produced by Farms and Ports .
	Books	The currency of science. Accumulating books increases your Technology Point (TP).	Produced by Libraries .
	Tech Point (TP)	Determines your army's raw battle strength.	Increases automatically as you gather Books.
	MP (Move Point)	The most critical resource. Every Move, Attack, or Construction costs MP.	Regenerates at the start of your turn.

3. THE MAP & TERRAIN

The world is built of hexagonal tiles. Understanding the terrain is key to survival.

-  **Plain:** Flat land. Ideal for construction. No combat bonuses.

- 🌲 **Forest:** Dense woods. Grants a **Defense Bonus (+2 Power)**. Units here are harder to kill.
- 🏔️ **Mountain: Impassable.** Units cannot enter, and buildings cannot be built here. Use them as natural walls.
- 🌊 **Water / Deep Water:**
 - Normally impassable.
 - **Requirement:** You must build a **Port** on a coastal land tile to move units into the water.
 - *Note:* Without a Port, your armies are landlocked. Also, you cannot enter deep water. You do not have ships!

4. BUILDINGS & ECONOMY

To build, click on a tile you own and select "**Construct**". Buildings can be upgraded up to Level 3 using the "**Develop**" button.

Building	Primary Output	Construction Requirement
🏠 Farm	Produces Food 🍷	Plain or Forest
⛏️ Gold Mine	Produces Gold 💰	Plain or Forest
📖 Library	Produces Books 📖	Plain or Forest
⚓ Port	Produces Food + Gold & allows sea travel	Must be on Land adjacent to Water

Strategy Tip: Upgrading an existing building costs less Movement Point (MP) than building a new one, but costs more Gold.

5. WARFARE & ARMY MANAGEMENT

🛡️ Recruiting

Click on any tile you own. Select "**Recruit**" to train soldiers.

- **Stack Limit:** Maximum **5 soldiers** per tile (Exception: **Red Civilization** can stack **10**).
- **Cost:** Soldiers cost Gold, Food, and MP.

👣 Movement

Select a unit and click an adjacent tile.

- **Action Cost:** Moving consumes MP.
- **Movement Limit:** A standard army can move **1 tile per turn**.
 - *Exception:* The **Red Civilization** armies can move **2 tiles per turn**.
- **Naval Transport:** To move from Land -> Water, the land tile *must* have a Port. Moving from Water -> Land does not require a Port.

Combat Mechanics

Combat starts automatically when you move into an enemy tile. The winner is decided by this formula:

Total Power = Dice Roll × Soldier Count × Tech Point × Civ Bonus

- **Terrain Bonus:** Defenders in a **Forest** get +2 Power.
 - **Casualties:** The loser is wiped out. The winner suffers casualties (20% - 80%) based on how close the battle was.
 - **Conquest:** If the attacker wins, they take ownership of the tile (unless the tile is Water/Mountain, which cannot be owned).
-

6. CIVILIZATIONS

Know your enemy and your own strengths.

The Red Civilization (Warlords)

- **Focus:** Pure Aggression.
- **Bonus:** Can stack **10 Soldiers** per tile (others cap at 5).
- **Ability:** Armies can move **twice** per turn.

The Blue Civilization (Scholars)

- **Focus:** Science.
- **Bonus:** Higher starting Technology Points and efficient Libraries.

The Yellow Civilization (Merchants)

- **Focus:** Economy.
- **Bonus:** Starts with extra Gold. Mines produce significantly more income.

The Brown/Black Civilization (Builders)

- **Focus:** Defense & Agriculture.

- **Bonus:** High food production to support massive armies and terrain defense bonuses.

7. QUICK START GUIDE

1. **Secure Income:** Immediately build a **Gold Mine** and a **Farm**. You cannot sustain an army without Gold to pay them and Food to feed them.
2. **Defend Borders:** Recruit at least 1 soldier on your border tiles. An empty capital is an invitation for defeat.
3. **Watch your MP:** Movement Points are your most valuable currency. Do not spend all MP on construction; save some to move troops if you are attacked.
4. **Check for Water:** If you are spawned on an island or near the coast, prioritize a **Port**. It is the only way to expand across the ocean.
5. **End Turn:** When you are out of MP or resources, click "**END TURN**" at the bottom right to let the AI or other players take their actions.

8. NUMERICAL VALUES & COSTS

Strategy requires math. Below are the specific costs and limits you must calculate before ending your turn.

A. Action Costs (Movement & Construction)

Every action consumes **Movement Points (MP)** and often **Gold**.

Action	 MP Cost	 Gold Cost	 Food Cost
Move Army	1	0	0
Attack	4	0	0
Recruit	3	50	0
Construct	5	300	0
Upgrade	3	250	0

⚠ CRITICAL ALERTS

- **Elimination:** If you lose your last tile, you are **Eliminated** from the game immediately.
 - **Water Rule:** You cannot conquer Water tiles, you can only move through them. You can only own Land tiles.
 - **Interaction Bar:** The interaction bar at the bottom changes based on what you click. If a button (like "Move") is missing, it means you lack the resources or the ability (e.g., trying to move twice with a non-Red civilization).
-

9. LORE

Brown has lost another big war... Their army quickly retreats from warzone and try to locate near to capital, to at least save it from the fire of Red. Another city cries from capture. Red soldiers marches down to barracks. Some remaining Brown's soldiers try to slow them. As the ashes falls on city, they slowly begin to realize their empire is no longer in its glorious days. They were the latest loss, but it does not seem like they will be the last. Brown's empire was the first empire in the MotherLand.

The legend says there were only 2 tribes in the beginning. White and Black. Blacks was stronger but white's were mightier. There were only them, but it did not stop them from fighting over. Some say it take spectrums to stop them, some say it did not take even a second. We do not know. But we know that white win when it was morning, and black win when it was night. Their unending war of existing remain until the Light gone for a moment, then it keep getting brighter. This made blacks to retreat shades, and whites to shine. The religion " Illumination " founded as the white tribe create first city of the ancient world: Ivoria. Ivoria was in between two rivers, it has fertile tiles and safe place for any potential invades from colour of Black. Colour of white created first paintings, first ever discoveries about light and The Template of Light. It was beautiful, as the ancient historians describe it as the heart of MotherLand until the First Separation happen.

That was the worst disaster to experience for any colour has ever lived. Childs of white was no longer seen or feel white, as they start to reflect different range of the Light. First, fathers start to not recognize their children. Then the child forgot their dad and they start to gather in high hills, to feel the Light more. Then the mothers can no longer birth whites, the babies keep crying until they showed in Light and the second they encounter with Light, they were no longer pure white. As the time pass, the situation start to pose threat to religion Illumination, as it see the colour of white as the only representantion of Light. But for the childs, the teenagers, the youngs, these beliefs does not matter. The higher priests and the remaining white adults start to see violation as the only solution, The first and last cleanup of world. So do youngs ;). As the screams rise from Ivorion, as the city collapses on grounds it's founded, the world getting ready for the creation of the New World. When the haze disappeared, the remaning was not a colour. They were the risen from the ashes. They were the childs of New World, and they were not same as their parents. They were four of them The blues, they were the representation of sky and freedom. Maybe this is why they move to FatherLand as the Colour Wars started. The red, namely blood and anger, were the representantion of rebellion. They were the first ones that attack and the ones that demolished the

Temple Of Light. Maybe this was the reason behind the Great Rebellion, as they rebel and organize other colours against Brown. The golds, they were the new representation of Light. After the First Separation, they were the representation of pride and antecedents. Maybe this made them very good merchantries, since they were the only one that can understand other colours beliefs and maybe this made them great miners, as they followed the Light throughout the tunnels of darkness. The last ancient colour, actually was not originated from Ivorian. The Brown's origin is not well-known, but the legend says they were the only survivors of Separation of Darkness, similar disaster but for blacks. But it is prominent that they are great warriors than whites and mightier than their origin, blacks. Maybe this was the reason they were the first empire of MotherLand.
